

TASK:AWS SERVICES

TITLE:S3

NAME:PAVUN KAVITHA

The screenshot displays the AWS S3 console interface. The main heading is "Amazon S3" with the subtext "Store and retrieve any amount of data from anywhere". Below this, it states "Amazon S3 is an object storage service that offers industry-leading scalability, data availability, security, and performance." A prominent "Create bucket" button is visible. To the right, there is a "Pricing" section stating "With S3, there are no minimum fees. You only pay for what you use. Prices are based on the location of your S3 bucket." Below the pricing section, there is a "How it works" section. The browser address bar shows the URL: <https://s3.console.aws.amazon.com/s3/get-started?region=eu-north-1>. The taskbar at the bottom shows the Windows operating system with various application icons.

Storage

Amazon S3

Store and retrieve any amount of data from anywhere

Amazon S3 is an object storage service that offers industry-leading scalability, data availability, security, and performance.

Create a bucket

Every object in S3 is stored in a bucket. To upload files and folders to S3, you'll need to create a bucket where the objects will be stored.

Create bucket

Pricing

With S3, there are no minimum fees. You only pay for what you use. Prices are based on the location of your S3 bucket.

Bucket type Info

☒ General purpose
Recommended for most use cases and access patterns. General purpose buckets are the original S3 bucket type. They allow a mix of storage classes that redundantly store objects across multiple Availability Zones.

☐ Directory - New
Recommended for low-latency use cases. These buckets use only the S3 Express One Zone storage class, which provides faster processing of data within a single Availability Zone.

Bucket name Info

pavun

Bucket name must be unique within the global namespace and follow the bucket naming rules. [See rules for bucket naming](#)

Copy settings from existing bucket - optional
Only the bucket settings in the following configuration are copied.

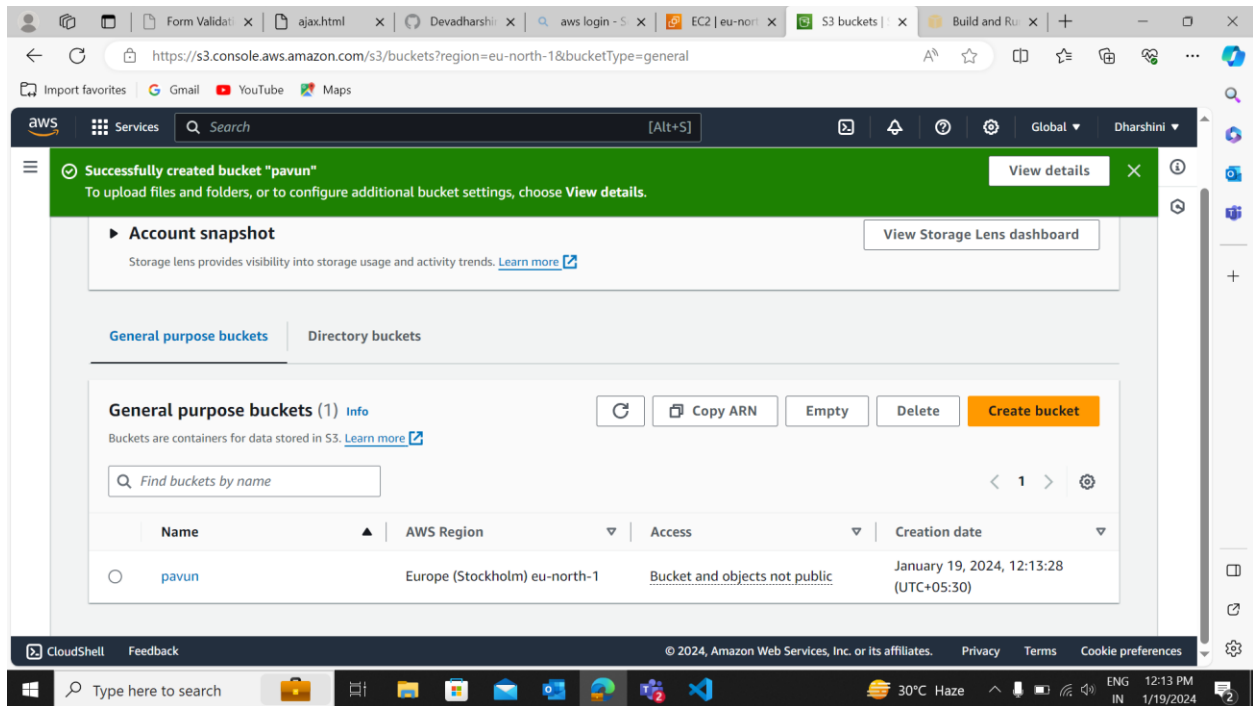

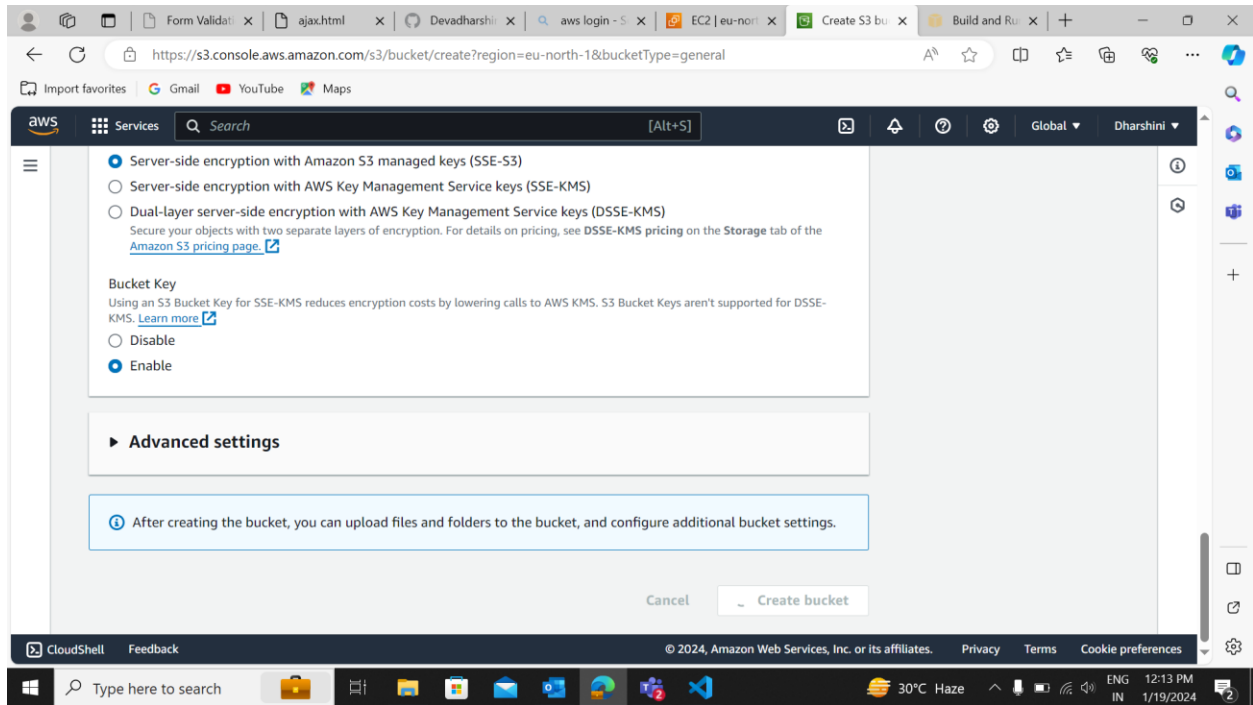

Choose bucket

Format: s3://bucket/prefix

Object Ownership Info
Control ownership of objects written to this bucket from other AWS accounts and the use of access control lists (ACLs). Object ownership
